

MOBILE ENERGY SERIES / 01

104 kWh

ITRAILER 104 KWH

Power and EV charging wherever a fixed connection is limited.

BUILT AROUND THE SITE

A transportable 104 kWh LFP unit with 60 kW DC charging, based on the manufacturer's iTrailer specification.

POSSIBLE APPLICATIONS

Temporary sites / Fleet support / Grid constraints

104 kWh nominal and 60 kW output are manufacturer-stated; final configuration to be confirmed.

MOBILE ENERGY SERIES / 02

217 kWh

ITRAILER 217 KWH

Bring substantial stored energy and rapid charging to the point of need.

BUILT AROUND THE SITE

A 217 kWh mobile battery and DC charging solution for fleets, events and demanding temporary sites. The product brochure states up to 180 kW DC output.

POSSIBLE APPLICATIONS

Fleet depots / Events / Construction

Capacity and output are drawn from the existing iTrailer brochure; project configuration to be confirmed.

POWER SOLUTIONS

CONCEPT B / BOLD

MOBILE ENERGY SERIES / 03

65.8 kWh

30 KW / 65.8 KWH BESS

Battery storage for commercial and industrial sites.

BUILT AROUND THE SITE

A 65.8 kWh LFP system with 30 kW on-grid and off-grid active power and a static transfer switch.

POSSIBLE APPLICATIONS

Site energy / Peak management / Resilience planning

Manufacturer-stated capacity at beginning of life; installation environment and design to be confirmed.
